The opinion of probable construction costs for was based on approximate quantity estimates for sanitary sewer improvements based on the Water Main and Sanitary Sewer Construction Plans prepared by Manhard Consulting, May 8, 2020. Quantities were multiplied by current construction industry prices. The opinion of probable costs shown, and any resulting conclusions on project financial or economic feasibility or funding requirements, have been prepared for guidance in project evaluation and implementation from the information available at the time the opinion was prepared. The final costs of the project and resulting feasibility will depend on actual labor and material costs, competitive market conditions, actual site conditions, final project scope, implementation schedule, continuity of personnel and engineering, and other variable factors. As a result, the project costs will vary from the opinion of the probable costs presented herein.
