Re: Z20-003: Cottonwood F1 Tract A- CWSD Well Drilling

Dear Ms. Nerger,

Thank you for the opportunity to review the development. We have the following comments to make on this project.

- Any objects on the site (including cranes used during construction) that penetrate a 100:1 slope from the nearest point of the nearest runway, penetrates the FAA Part 77 airspace surface, impede signals associated with navigational equipment or any other reason the FAA deems necessary will require the filing and approval of FAA Form 7460-1. This form may take 90 days or more for approval. Please visit <https://oeaaa.faa.gov> to utilize the notice criteria tool to confirm filing requirements and to file the FAA Form 7460-1. Please note that this is a State and Federal regulatory requirement. Any proposed objects on this site may require the filing and approval of a FAA form 7460-1. Runway endpoint data is available from the Airport for engineering calculations. In addition, please have crane operators advise the airport prior to erecting any cranes.

Please feel free to call me or email if you have any questions.

Sincerely,

Rachel Keller
